Universal Track Mounted Sectional Door Security

The BeLock is a track mounted locking system that traps the roller. And, because BeLock is not fastened to the door itself there's no chance of it jamming in the track like traditional slide locks. BeLock's heavy duty construction and corrosion resistant powder coating makes it the only lock that will outlast your door.

BeLOCK™

Pat. No. 9,187,931

The BeLock locking solution:

- Hard coat anodized, billet aluminum mounting block
- Available for left hand and right hand applications
- Welded steel housing, powder coated
- Tool steel locking pin
- Heavy duty release spring
- Accepts standard pad lock (not included)
- Mounts on door track
- Made in USA

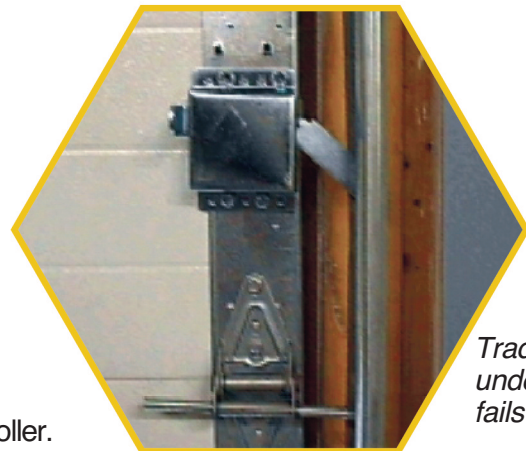

Benefits:

- More secure than traditional slide locks, as the BeLock traps the roller.
- Does not ride up with the door, eliminating the lock from jamming in the radius of the track.
- Pin will not bend, eliminating down time when slide lock cannot be opened.
- Strong lateral spring action, positively removes the pin from moving parts of the door.
- Built to last longer than your door, can be reused over and over.
- Coated housing, pin and latch prevents corrosion.
- Never needs lubrication.
- Lifetime Warranty
